

Ceramic / Mica Insulated Strip Heaters

Ceramic

Mica

- ▶ M.S. Plated S.S. or Brass sheath casing provides the best combination of physical strength, high emissivity and good thermal conductivity to heated surfaces essential for good heater life.
- ▶ A specific nickel-chrome resistance wire.
- ▶ Specially selected mica grade/Ceramic runner and thickness is used to insulate the windings providing excellent thermal conductivity and dielectric strength.
- ▶ For maximum connecting surface, the specially designed Brass screw terminals are securely fastened to a connecting jumper, assuring positive contact with the windings, providing maximum current carrying capacity.

TYPICAL APPLICATIONS :

- ▶ Food Warming Equipment
- ▶ Packaging Equipment
- ▶ Blow Moulding Equipment
- ▶ Testing Equipment
- ▶ Hot Plates
- ▶ Ovens
- ▶ Moulds
